

1.0.1 VERSION

New standby pointers with faster pulse animation (2 seconds instead of 3)

INSTALLATION

Copy the files to the Cursors folder (C:/Windows/Cursors/EDGE by default) and overwrite them

This will replace the original files of the cursor set. To restore it, simply use its .inf file and reinstall it

Push the Windows Key and type "Change how the mouse pointer looks" into the Windows search box and press Enter (In Windows 8, typing anywhere on the Start Screen brings up the search box automatically.)

Click the Pointers tab in the Mouse Properties window

On the Pointers tab, click the down arrow on the box under Scheme and select EDGE

Click Apply and then OK

Changing cursor sets back and forth may be necessary to refresh the pointer list properly.
